Introduction

A website for the Dehiwala zoo, consisting of 7 HTML pages and styled purely by CSS.

One animal, in my case The Manta Ray, has its page styled by 2 CSS sheets, one commented out, so the swapping can be seen.

The wireframe designs are submitted separately

The link the the webpage-

<https://rue-d.github.io/webpages/index.html>

Conclusion

Overall, This webpage was made as efficiently as possible in a mobile first manner. Addmittedly I did this assignment in haste, but yet managed to learn quite a lot.

I hope my errors don't effect my grades too much, and I hope I have met all the requirements for the assignment
